

I know what it means to be a guardian of our world.

I know that the earth is made up of land, sea and sky.

I can name two features of our wonderful world e.g., plants and animals.

I know that recycling means reusing old materials.

# Guardians of our Planet

I know that caterpillars cocoon into butterflies.

I can name the following parts of a plant: flower, stem, leaves and roots.

I know that a plant needs water, air, warmth, soil and sunlight to grow.

I know that butterfly wings are symmetrical, meaning they are the same on each side.
